living out 13 year-old me's dream xD. I regret everything and everything, this game is trash. WHY did i buy this game

STUPID ME x2. This game gets extremely boring after around 40 mins of playing, would not recommend.. This is a game. You play it. Then you turn it off. For me, I played it some. I also played other games. I like chocolate.

I hope that helps you make an informed decision.. So this is very very good i love it but i did not play it at first because there were holes in very human but i got fixed GET IT ITS FUN. This game WAS alot of fun nut now I get no events , there are ALOT of bugs that make the game unplayable. I have researched these bugs and I have found that they have been ignored by the Devs. Not little bugs where there is a work around. Major bugs now that there is NO reason to play this game. Some of these bugs were complained about as far back as 2016. The mostly positive reviews are misleading because these were reviews made while the game was in early access and people are forgiving. I just tried to make a 10th new game to get events to trigger and to get other events to trigger and possibly bypass these bugs. I am done with this game now until the bugs are fixed. And no, I don't need to make yet ANOTHER post on their site to let them know what these bugs are since they have been around from the jump. Well, they have my money because I supported them and their idea before the full release. If I could get a refund, I would want it. I don't mind bugs as long as something is done. Nothing has been done, they instead decided to change the game completely and ignore what we PAYING , Supportive customers have been saying. So, if you want an incomplete, "full" release game that the devs ignore the issues on, go ahead. Spend your money. But I highly recommend you NOT purchase this game. It looks fun, but it's hard to have fun when you can't play the friggin game. Thanks. ENG:

I can't trust anymore U-Play Online company because, they never update their games & still this game not providing almost any features that i looking for.

I can't recommend the product.

FIN:

Min voi en voi en luottaa U-Play Online yritykseen koska he eivät koskaan pelivaihtojen pelejä & silti tullaan peliä ei vielä tarjoa mitään ominaisuuksia joita haluan.

En voi suositella tuotetta.

I'm not sure how, but when I played it for the first time since 2018, the quality apparently went from 'game developed by a small company' to 'project made by one guy in his basement'. The grammar is terrible, the music is awful, the UI is ugly and cluttered, and overall I simply cannot recommend this game.. Very big meh.. Don't waste your money and time on this. I would Like to say that this is a good game, but I cant.

You spend so much time doing some thing then it breaks, you cant move or do anything,

This is really annoying,

Please try to fix this random bugs.. Pretty fun game not worth 25 euro's but 10 euro's would be fine. Game should be 10 instead of 20 something dollars, not worth it
